Matching dollar-for-dollar reimbursement, up to \$10,000, for safety and health equipment and/or training that will prevent workplace injuries/illnesses

For MN employers

- On-line application
 - https://secure.doli.state.mn.us/grants/

Written (on-site) hazard survey

 Goal: To promote investment in worker injury/illness prevention

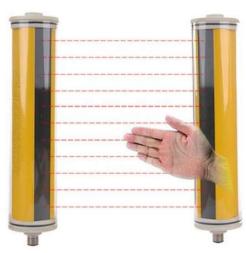

Safety Grants

Matching dollar-for-dollar reimbursement, up to \$10,000, for safety and health equipment and/or training that will prevent workplace injuries/illnesses

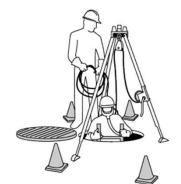

- Added priority:
 - Employers within the MNOSHA Strategic plan
 - Priority industries

Project examples...

MNOSHA

To make sure every worker in the State of MN has a safe and healthful workplace.

Strategic emphasis includes grain facilities

 NAICS code 424510 – merchant wholesale distribution of grains, such as wheat, corn, barley, and unpolished rice; dry beans, soybeans, and other inedible beans. Included are establishments primarily engaged in operating country or terminal grain elevators primarily for the purpose of wholesaling.

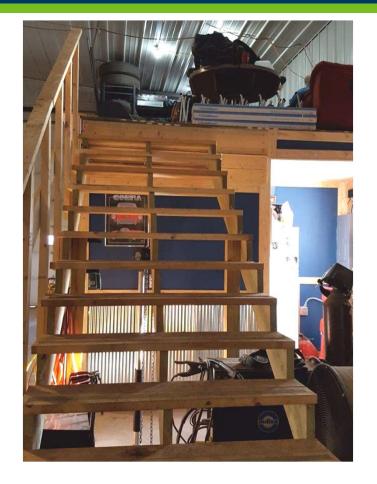

Workplace Safety Consultation:

- Grain handling and farming establishments have an added priority towards receiving a safety grant, for equipment and/or training that will prevent worker injuries/illnesses
 - including ROPS (to support MN's ROPS program)

Hazards IdentifiedNAICS 424510, 493130, 311xxx

Walking/working surfaces

- Not maintained clean and orderly
- Open-sided floors / stairs no standard guard railing
- Floor opening not covered
- Stairs w/o uniform riser height / tread width
- No gate or off-set at fixed ladder access
- No floor load rating

Hazards Identified NAICS 424510, 493130, 311xxx

Machine guarding

- Bin augers
- Power transmission apparatus (i.e. belt/pulley, rotating shaft, chain/sprocket...)
- Fan blades
- H-frame hydraulic press

Receiving pit

• Grate openings >2 ½"

Electrical

- Not suitable for the location
- Improper use of flexible cords
- Blocked electrical panel
- Unused openings (knockouts, circuit breakers...)
- No strain relief cord/plug
- Ungrounded equipment / fixtures
- Exposed/damaged live electrical
- Electrical safe work practices

- Electrical continuity metal raceways/conduit
- Circuit breakers not labeled
- No GFCI

Grain / combustible dust

- Housekeeping (spilled grain, dust accumulations...)
- Routine equipment inspections
- Training
- Contractor management

Ladders

- No slip resistant feet at the base
- Inappropriate ladder use
- Damaged or otherwise not maintained
- Ladder side rails not extending 42" above landing
- No climbing safety device or cage on 40' fixed ladder
- Landings not provided every 20'

- Emergency equipment
 - Portable fire extinguishers

- Key left in lock
- Lack of LOTO procedures

No safety latch

- Flammable liquids
 - Fuel dispensing system not protected
 - Improper dispensing
- Confined space / bin entry
 - Permit spaces not labeled
 - Atmosphere not tested...
 - No system for non-entry rescue
 - Entry permit not utilized

- Compressed air
 - Not <30 psi when dead-ended
 - Hose connections not designed for the pressure and service...
- LPG storage
 - Away from heat/flame, physical damage or tampering...
- Exit routes
 - Doors locked
 - Exit signs not readily visible
 - not labeled

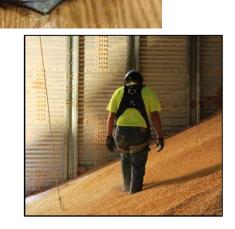

• PPE

- Improper respirator storage
- Voluntary use Appendix D
- Certified PPE assessment

HazCom

- Unlabeled containers
- SDS

Training:

- HazCom
- General Safety
- Bin entry, LOTO,
- Hot work permit
- Housekeeping

3/27/2019

16

Powered industrial trucks

- Operator performance not re-evaluated
- Wheels not chocked before entering semi-trailer

- Work rest / tongue guard adjustment
- Foreign material embedded...

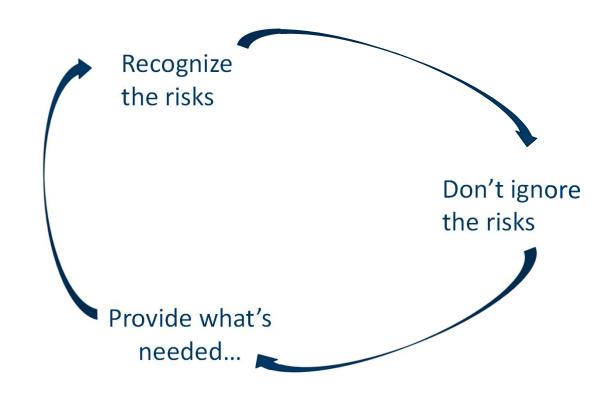

• MN specific rules:

- CO monitoring
 - Work area monitoring (when internal combustion powered vehicles operate indoors)
 - Exhaust gas testing, during final engine tuning, in a regular maintenance program
- Automatic overhead doors (w/ sufficient weight or closing force to cause crushing injury)
 - Reversing or pressure relief mechanism
 - Constant pressure closing switch
 - 3-button control station with warning placard

Plan your work...

Don't only focus on the final outcome, but also think about how you will get to that final outcome

Thank You!
